

Severe weather bulletin – 12th November 2021

We do everything we can to keep traffic moving on priority roads and we are open about the fact we cannot grit every road in Lancashire. Even if we had the resources needed we couldn't grit them quickly enough to make a real difference.

No council does this. It is important people understand there are limitations to the service we can provide.

That is why we ask residents to take steps to make sure that when severe winter weather strikes they are prepared and able to manage.

What we do

- The county council is responsible for over 4,300 miles of roads of which approximately 1,800 miles are part of Lancashire's 'Priority Road Network' for salting and snow clearing.
- It can take our gritters up to four hours to grit one route and even longer in severe weather conditions. This means sometimes we can't grit as often as we would like.
- When low temperatures are forecast we grit the roads as a precaution before the frost forms, usually during the evening or early hours of the morning. Remember weather forecasts are only a guide and our local knowledge and expertise is vital in deciding what to do.
- Despite our best efforts, winter weather can still make roads treacherous and there is no guarantee that roads will always be completely free of ice and snow. Take extra care.
